PROFESSIONAL EXPERIENCE

MERN Stack Developer

Dtecherz | 2024 - Present

- Built and maintained internal and client-based applications using Next.js, React.js, and Firebase.
- Developed a complete Attendance Management System using Next.js + Firebase, automating daily operations.
- Contributed to the Trading Bot Platform, integrating API-driven data visualization and real-time updates.
- Designed and implemented reusable UI components using Ant Design and optimized API performance

React.js Developer

Lahore Based Individuals (Remote) | Sept 2024 – Dec 2024

- Developed and maintained dynamic React components for client web apps.
- Integrated REST APIs and enhanced frontend efficiency and responsiveness

WordPress Developer

SJN Services | Feb 2021 – Dec 2022

- Designed, customized, and optimized WordPress websites and plugins.
- Improved SEO, page load speed, and user engagement for client projects

PROJECTS

- Digital Product Marketplace** – Full-stack Unsplash/Pexels-style website with admin panel, checkout, and Firebase authentication (Next.js + Firebase).
- AI Chatbot** – Built intelligent chatbot using Gemini API with Next.js UI.
- Attendance Management System** – Next.js + Firebase-based internal tool for DTecherz.
- E-commerce Platform** – Full-stack MERN app with product and checkout management.
- Career Counseling Application** – Final Year Project using Next.js & MongoDB
